To Whom It May Concern:

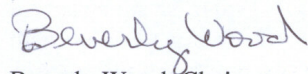

This is a letter of reference for Marc Diament Architect.

Marc recently completed a State Historic Fund Structure Assessment for us on the Old Jefferson School House in Jefferson, Colorado. This is a frame building, over 100 years old, that is located on the old Main Street in Jefferson.

We were completely satisfied with the completed assessment. It has now been approved by the State Historic Fund. His work was always completed before expected, and there was never a problem for us in the process.

It was certainly a pleasure working with Marc. He went out of his way for our needs and was available to all of our questions. Even after his work was complete he spent more time finding additional materials for us. This is information that we will use in the next phase of the restoration of the building.

If we need the services of an architect in the future we would call upon Marc Diament Architect.
